## Senate Bill #S3041: **OPPOSE**

**Author:** Liz Krueger (D,WF) District 28, NYC, Times Square

**Relates to:** Permits any child who is at least fourteen years of age to have administered to himself or herself, regardless of parental consent, certain immunizations required or recommended

**THIS BILL OVERRIDES PARENTAL CONSENT AND COULD PUT CHILDREN IN IMMINENT DANGER BECAUSE THEY WOULD NOT UNDERSTAND THE SHORT-TERM OR LONG-TERM SIDE EFFECTS OF THE IMMUNIZATIONS. THEY COULD BE EASILY SWAYED IN A DIRECTION THAT MAY NOT BE BEST FOR THEIR HEALTH HISTORY.**

**NYS September 25th, 2021 -**

This bill would give unauthorized “authority figures” the ability to compel children to choose their unauthorized opinion over that of the children’s parents or guardians. If approved, this bill would provide another amendment to public health code law [2504](#), eliminating more parental rights. Parental rights are in place to provide minors with protection from those who may cause them harm, either intentionally or unintentionally. The Parental Rights Act contends that children do not have the mental capacity to understand all the possible ramifications of a medical decision. This bill not only removes the protection of the parental rights for minors, but it also removes the PCP protection for minors by allowing any unauthorized Health Care Practitioner to perform the immunization, even those without the prior knowledge and understanding of the child’s health issues that might necessitate abstaining from said medical treatment. Without parental consent, these unqualified health-care practitioners would be allowed to inject the Meningococcal Meningitis vaccination or any and all “vaccinations” recommended by the CDC, such as the flu shot (not a vaccine), HPV, COVID gene therapy and so on. This is of serious concern as these are intrusions into individual liberty, autonomy, and parental decisions about child-rearing. The Frederick Douglass Foundation urges opposition to this bill as we stand for and by the rights of parents and guardians to make the right choice for their children and families in medical matters.

**Call To Action:** Contact your local Senator, representative to set up an appointment to tell them you vehemently oppose this bill. Contact each member of the NYS Health Committee. Go to the bill page to leave a public comment and Check nay for support [HERE](#)
